PROFILE

Organized, detail-oriented, with passion for Front End Development, willing to join a team of like-minded developers.

A total commitment to hard work, learning new things, and willingness to take risks.

WORK EXPERIENCE

- **Capstone Portfolio** – *private project* built for my school to showcase what I have learned throughout my techdegree course in TeamTreehouse, and not only. Used JavaScript, CSS/SASS and HTML to build it. Implemented form validation, smooth scrolling, scroll spy and DOM manipulation. Layout the content using flexbox. Also added various of CSS animations to the page. (https://marzena-szopinska.github.io/Capstone_Portfolio/)
- **Wedding Page** – *private project*, built using SASS, HTML and JavaScript. Layout the content using flexbox and CSS positioning. Implemented image slider, that changes pictures every two seconds, smooth scrolling behaviour, triggered fade in a content animation on scroll. Also added google map to the page, some cool CSS animations and tricks like clip-path property to make my header and the footer more interesting. (https://marzena-szopinska.github.io/Wedding_Page/)
- **Employee Directory** – *private project*. Recreated the employee directory application completely by myself using ReactJS. Layout the content using CSS grid. Used fetch and promises to fetch twelve random people from a different source to use in my application. Also added modal window to find out more about a person the user has clicked. (<https://react-employee-directory.netlify.com/>)

EDUCATION AND QUALIFICATIONS

- High School (ZSEU in Zychlin)
- City & Guilds (level 7) Certification in Game Programming, UK

COURSES

- **Teamtreehouse** – Techdegree in Front End Web Development (<https://www.credential.net/iu0jdgbt>)
